

Academic integrity declaration

By submitting work for assessment, I hereby declare that I understand the University’s policy on academic integrity and the rules of the assignment as set by the subject coordinator regarding the use of artificial intelligence software, including editing and translation tools.

I declare that the submission is original and solely my work, and that I have not been assisted by another person (collusion) apart from where the submitted work is for a designated collaborative task, in which case the individual contributions are indicated. All sources and tools used have been appropriately cited or acknowledged, and any copied or modified code has been declared using the methods indicated by my subject coordinator.

Assignment 2: Replicate a complex model in Java or Python (report)

12.5/19 Points

Due: Fri May 29, 2026 23:59

Anonymous Marking: no

Unlimited Attempts Allowed

Available: Apr 15, 2026 9:00 until Aug 1, 2026 23:59

Details

21 April: Assignment 2 released.

Assignment specification: [cx asg 2 2026.pdf \(https://canvas.lms.unimelb.edu.au/courses/237797/files/27030737?wrap=1\)](https://canvas.lms.unimelb.edu.au/courses/237797/files/27030737?wrap=1) [↓](https://canvas.lms.unimelb.edu.au/courses/237797/files/27030737/download?download_frd=1)
(https://canvas.lms.unimelb.edu.au/courses/237797/files/27030737/download?download_frd=1) .

Please register your group by going to the [People \(https://canvas.lms.unimelb.edu.au/courses/237797/users\)](https://canvas.lms.unimelb.edu.au/courses/237797/users) section of the Canvas site (use the "Assignment 2 Group" tab) and signing up for your group. Use your contacts and the threaded replies in the "A2 (team formation)" channel of the [Discussion Board \(https://edstem.org/au/courses/31670/discussion\)](https://edstem.org/au/courses/31670/discussion) to find teammates.

If you have not found a group by the end of May 1, 2026, let me (Artem) know, and I will randomly assign you to a group.

Extensions: Please see the [FEIT Extensions and Special consideration \(https://canvas.lms.unimelb.edu.au/courses/237797/pages/feit-extensions-and-special-consideration\)](https://canvas.lms.unimelb.edu.au/courses/237797/pages/feit-extensions-and-special-consideration) page.

Academic integrity: Please see the [Academic Integrity \(https://canvas.lms.unimelb.edu.au/courses/237797/pages/academic-integrity\)](https://canvas.lms.unimelb.edu.au/courses/237797/pages/academic-integrity) page.

Proposal due date: ~~11:59 pm Friday, 8 May~~ 11:59 pm Friday, 11 May

Please submit your assignment proposal [here \(https://canvas.lms.unimelb.edu.au/courses/237797/assignments/628791\)](https://canvas.lms.unimelb.edu.au/courses/237797/assignments/628791).

<https://canvas.lms.unimelb.edu.au/courses/90081/files/2719922/download?wrap=1> <https://canvas.lms.unimelb.edu.au/courses/90081/files/2707349/?wrap=1>

<https://canvas.lms.unimelb.edu.au/courses/90081/files/2719922/download?wrap=1> <https://canvas.lms.unimelb.edu.au/courses/90081/files/2707349/?wrap=1>

Final report and code due date: 11:59 pm Friday, 29 May

Please submit your assignment code [here \(https://canvas.lms.unimelb.edu.au/courses/237797/assignments/628790\)](https://canvas.lms.unimelb.edu.au/courses/237797/assignments/628790)
[. \(https://canvas.lms.unimelb.edu.au/courses/237797/assignments/628790\)](https://canvas.lms.unimelb.edu.au/courses/237797/assignments/628790).

After submitting Assignment 2, please complete the [group contribution feedback quiz \(https://canvas.lms.unimelb.edu.au/courses/237797/quizzes/311039\)](https://canvas.lms.unimelb.edu.au/courses/237797/quizzes/311039).

Report Marking Rubric									
Criteria	Ratings								
Background & Model	Full marks	Excellent	Excellent	Very good	Very good	Good	Good	Poor	
	You have clearly stated the aims and objectives of your study and provided an appropriate review of background material on your chosen model, including justifying why the system modelled is of interest and is a “complex” system. You have clearly described the design of your model, including describing the components and interactions, how the model relates to the real world, and how you have designed your Java or Python implementation. 5 pts	4.5 pts	4 pts	3.5 pts	3 pts	2.5 pts	2 pts	1.5 pts	

Criteria	Ratings								
Replication & Extension	Full marks	Excellent	Excellent	Very good	Very good	Good	Good	Poor	
	You have designed and executed appropriate experiments to explore and compare the behaviour of your Java or Python model and the original NetLogo model. You have described a range of scenarios used in your experiments. You have designed and implemented an appropriate extension to your Java or Python model, specified a question that this extended model allows you to address, and used your model to address this question. 5 pts	4.5 pts	4 pts	3.5 pts	3 pts	2.5 pts	2 pts	1.5 pts	
Comment - Description of the scenarios used in the experiments is unclear - Experiment design could be improved (eg, chosen more carefully for replication, considered more for extension) (Kindly see pdf for comments)									

Criteria	Ratings								
Results & Discussion	Full marks	Excellent	Excellent	Very good	Very good	Good	Good	Poor	
	You have clearly presented the results of your investigations using clear and appropriate tables and figures. You have interpreted and discussed the results of your experiments, the outcome of the replication exercise, and the answer to the question addressed by your model extension. 5 pts	4.5 pts	4 pts	3.5 pts	3 pts	2.5 pts	2 pts	1.5 pts	

Comment

- Tables and/or figures that summarize results are unclear (eg, R3 and R4 on page 5)
- Interpretation of results is unclear
- Discussion of the answer to the question addressed by the extended model is incomplete

(Kindly see pdf for comments)

Writing	Excellent	Very good	Good
	Your writing is well-expressed, clearly proof-read and demonstrates a coherent development of ideas. Your appendix outlines the successes and challenges involved in achieving your group’s plan. 2 pts	Very good writing with rare minor issues identified. 1.5 pts	Good writing with occasional issues that cause challenges for understanding the presented ideas and discussions. 1 pts

Criteria	Ratings		
Presentation view longer description	Excellent The submission is presented to a highly professional standard. Visual elements are clear, high quality, consistently sized, and well integrated. Indentation, spacing, fonts, captions, referencing, and overall layout are applied accurately and consistently throughout, with no noticeable formatting issues. 2 pts	Very good The submission is presented to a strong standard. Visual elements are generally clear, high quality, and appropriately sized. Formatting, including indentation, spacing, fonts, captions, and referencing, is mostly consistent and accurate, with only minor issues that do not detract from the overall presentation. 1.5 pts	Good The submission is presented to an acceptable standard. Visual elements are mostly understandable, though some may lack clarity, consistency, or polish. Formatting is generally adequate, but there are noticeable inconsistencies in layout, spacing, fonts, captions, referencing, or associated formatting. 1 pts
	Comment - Formatting of the results could be improved (eg, consistent, font size) - Selecting what content to include and discuss could be improved		

File Name		Size
